## About Us

The Pearls Event Center is a newly constructed, modern facility that can be customized into the venue of your dreams. Easily accessible from the freeway & conveniently located near two newly constructed hotels makes this venue great for wedding, receptions, parties as well as corporate meetings. The Pearls Event Center leverages technology to help elevate your event. With hydraulic stage, customizable chandelier colors & heights, and live streaming the possibilities to make your event stand out are endless. Not only will your party guests be able to use the indoor space, but Pearls Event Center also has an intimate outdoor gathering space that guests can leverage for photo ops or to have conversations with one another in a quieter setting. We understand planning an event can be stressful which is why we limit our capacity to one major event per day. This allows us to offer you all day access to the venue to set up and prepare for your event, making it so you don't have to rush before your event begins. Additionally, we have selected our vendors very carefully and have a standing relationship with them all. All vendors we work with have worked with us on previous events so you can trust that your event is in capable hands.

## About Our Team

Our experienced and professional team is looking forward to bringing your dream event into fruition. Our team's experience allows us to recommend trusted vendors, provide helpful advice, and ensure seamless execution of your event. We will only be focusing on one major event a day, which will ensure your event gets our undivided attention. When you choose Pearls Event Center you will be treated like family and we will treat your event as if it were our own.
